P R O J E C T S

Soundtrack to that Movie | [https://github.com/trionb/soundtrack-that-movie] | [https://trionb.github.io/soundtrack-that-movie/]

- This web app is designed to find the soundtrack to any TV or movie that you search for. Listen to the top 3 search results.
- My core responsibility was the front-end development.
- Tools / languages used were [BootStrap,JavaScript,CSS3,HTML5,jQuery,OMDB API & Youtube API]

Fyre | [https://github.com/trionb/Fyre] | [https://fyre-app.herokuapp.com/]

- Fyre is a music application that allows users to discover their new favorite songs. Upon entering the user's Spotify login to verify credentials for our Spotify API, the user will be directed to our home page where a random playlist will begin playing 30 second previews of songs for the user.
- My core responsibility was working on the backend specifically working with Spotify's API.
- Tools / languages used were [BootStrap,JavaScript,CSS3,HTML5,jQuery & Spotify's API

Note Taker | https://github.com/trionb/note-taker | [https://note-taking12.herokuapp.com/notes]

- This is a note taker app that was generated using express.js. In this app you can create a note and delete the ones you no longer want.
- My core responsibility was developing the application to meet the homeWork requirements.
- Tools / languages used were [javaScript & express.js]
